SKILLS

Frameworks & Runtime: NestJS, Node.js, TypeScript, Django, tRPC, REST, WebSockets (Socket.io)

Databases & Caching: PostgreSQL, Redis, Prisma ORM, SQLite, SQL, Elasticsearch

Infrastructure & DevOps: Docker, Nginx, Linux Server, AWS S3 / MinIO, CI/CD, Bash

Auth & Tooling: JWT, OTP flows, RBAC, Zod, Celery, Turborepo, pnpm, Git, Unit Testing

RELATED EMPLOYMENT

Backend Engineer

Codesheen

Full-time, On-site

Oct 2023 – Jul 2026

- Designed and maintained production NestJS APIs across 8+ client and internal projects over a nearly 3-year tenure in a 7-engineer team.
- Modeled relational schemas in PostgreSQL with Prisma ORM, enforcing strict data integrity and migrations across multi-tenant monorepos.
- Implemented authentication systems using OTP-based flows, JWT session management, and fine-grained RBAC, isolating roles across all user tiers.
- Introduced end-to-end type safety between server and client via tRPC and Zod, eliminating runtime API contract errors across production deployments.

Selected Project Deliverables:

Battery ESP/MSK E-Commerce Dec 2025 – June 2026

[\[Live Demo\]](#) [\[Desc\]](#)

Built the shared NestJS backend for two production bilingual e-commerce brands in one Turborepo monorepo. Architected the PostgreSQL schema and engineered the serial-number warranty verification system — generating a key database and validating customer submissions at request time.

Alzahra Gold Wholesaler B2B Platform Mar 2024 – Apr 2024

[\[Live Demo\]](#) [\[Desc\]](#)

Contributed to the Django REST backend for a gold wholesale B2B platform — built endpoints for pricing, order management, and transaction tracking consumed by the buyer dashboard.

Goldenbat GPS Tracking Sep 2024 – Jan 2025

[\[Live Demo\]](#) [\[Dashboard\]](#)

Contributed to a high-throughput GPS ingestion backend processing 10,000+ coordinate updates/min — serving live positions, historical routes, geofencing alerts, and device assignments to fleet operators.

Taxiland Ride-Sharing Platform May 2024 – Aug 2024

[\[Archived MVP\]](#)

Contributed to the tRPC/NestJS backend for an intercity ride-sharing platform — built endpoints for passenger booking, driver assignment logic, and the support ticketing system powering the dispatch admin panel.

SELECTED SOLO PROJECTS

Atrafian Chat & Social Ecosystem Jan 2026 – Mar 2026

[\[atrafian.ir\]](https://atrafian.ir) [\[App Demo\]](#)

Sole architect and developer of the NestJS backend for a production social platform with real-time chat, stories, media handling, and a payment gateway.

- Architected a Socket.io real-time chat gateway (personal, group, support channels) with automated FCM push fallbacks for offline clients and dynamic room routing.
- Eliminated N+1 query bottlenecks in group messaging via single-query bulk SQL aggregations, maintaining sub-second delivery in 1,000+ user rooms.
- Built a server-side NSFW and illegal-word content filter pipeline and a support/ticketing system, integrated with a wallet and payment gateway for in-app credits.
- Managed media uploads (voice, images, video) through self-hosted MinIO; used Redis for OTP delivery and session caching.

EDUCATION

B.S. in Computer Science June 2026

SRBIAU – Tehran, Iran
