

# Parsa Niavand

Tehran, Iran — [Email](#) — [GitHub](#) — [LinkedIn](#) — [parsany.ir](#)

## SKILLS

---

Next.js, React, TypeScript, Tailwind CSS, NestJS, tRPC, Zod, TanStack Query, Zustand, Framer Motion, shadcn/ui, Docker, PostgreSQL, Redis, Prisma, AWS S3, CI/CD, Nginx

## RELATED EMPLOYMENT

---

### Fullstack Web Developer

Codesheen

Full-time, On-site

Oct 2023 – July 2026

- Worked in a team of 7 engineers across 8+ concurrent client and internal projects over 3+ years.
- Built full-stack apps with Next.js and NestJS inside Turborepo monorepos; cut build times by 30%.
- Built the frontend across most projects using Tailwind and shadcn/ui, consistently hitting 90+ Lighthouse scores.
- Added end-to-end type safety across APIs using tRPC and Zod, which eliminated a whole category of runtime errors.
- Built and shipped client-facing websites; handled on-page SEO, metadata, and page speed optimization.
- Converted Figma designs into clean, interactive UI components.

*Selected projects delivered at Codesheen:*

#### Goldenbat GPS Tracking Sep 2024 – Jan 2025

[\[Demo\]](#) [\[Dashboard\]](#) [\[Desc\]](#)

Co-built a GPS fleet tracking web app connected to real IoT hardware. The backend ingests 10,000+ coordinate updates per minute with sub-second latency. I built the landing frontend and the dashboard with Next.js: live map view, historical paths, geofencing alerts, and device management.

#### Battery ESP/MSK E-Commerce Dec 2025 – June 2026

[\[Demo\]](#) [\[Desc\]](#)

Shipped two production bilingual e-commerce sites and an internal admin panel with a single monorepo. Converted Figma designs into responsive React interfaces that are a pixel-perfect, 1-to-1 match with the design, optimizing translation bundles to keep page loads sub-second.

#### Alzahra Gold Wholesaler B2B Platform Mar 2024 – Apr 2024

[\[Demo\]](#) [\[Desc\]](#)

Built the Next.js frontend for a wholesale gold trading portal. Engineered the buyer dashboard and multi-step gold purchasing workflow on top of a Django API, optimizing landing page performance to achieve a desktop Lighthouse score of 99.

#### Taxiland Ride-Sharing Platform May 2024 – Aug 2024

[\[Archived MVP\]](#)

Collaborated on an intercity ride-sharing app. Built the web admin panel with Next.js and tRPC for dispatch operators to handle driver assignment and support tickets.

## PERSONAL PROJECTS

---

#### Atrafian Chat & Social Ecosystem Jan 2026 – Mar 2026

[\[Link\]](#) [\[App Demo\]](#)

A real-time chat and social app with a native mobile build (Capacitor.js), a web client, and a separate admin dashboard. Socket.io handles messaging; Redis caches hot data and cuts DB reads by 50%. The whole thing runs on a NestJS backend with MinIO for file storage.

#### HimehPub Bookstore Feb 2025 – Mar 2025

[\[Demo\]](#) [\[Desc\]](#)

full-stack bookstore: authors upload titles through an admin dashboard, customers browse, add to cart, and check out via a local payment gateway. OTP-based auth. Order state managed with Zustand so users can track exactly where their order is inside their panel.
