PARSA NIAVAND

Software Engineer | **Full Stack Developer**

React / Next.js / Node.js / TypeScript / NestJS

vvsparsa@gmail.com · linkedin.com/in/parsany · github.com/parsany · parsany.com · +374 33 877 067 · Yerevan, Armenia

Full-stack engineer with 3 years of production experience coordinating with designers, clients, and teammates to plan, phase, and deliver features across concurrent projects — e-commerce, real-time tracking, dashboards, and SaaS applications.

PROFESSIONAL EXPERIENCE

Fullstack Engineer Codesheen

Full-time, On-site Oct 2023 – Jul 2026

- Worked directly with designers and teammates to decide on technologies, structure project phases, and keep delivery on schedule across 8+ concurrent client and internal projects.
- Worked as one of 4 core engineers (alongside 2 designers and 2-3 remote contributors), delivering on **8+ concurrent client and internal projects** over a near 3-year tenure.
- Built and maintained full-stack production applications using Next.js and NestJS within Turborepo monorepos, **reducing build times by 30%**.
- Led frontend development with Tailwind CSS and shadcn/ui, achieving **90+ Lighthouse scores across production interfaces** through optimization of Core Web Vitals and SEO.
- Implemented end-to-end type safety across APIs using tRPC and Zod, **reducing runtime errors and improving API reliability**.

Selected Project Deliverables:

Goldenbat GPS Tracking Sep 2024 – Jan 2025 Live Demo | Mobile Demo | Dashboard

Co-built a real-time GPS fleet tracking platform ingesting **10,000+ coordinate updates per minute** with **sub-second latency**. Developed landing page + mobile PWA with Next.js. Contributed to fleet dashboard using Mapbox for interactive GIS mapping, geofencing, live tracking, device management, and notifications.

Battery ESP/MSK E-Commerce Dec 2025 – June 2026 Live Demo | Dashboard

Shipped two production bilingual e-commerce sites and an internal admin panel in a single monorepo (NestJS, PostgreSQL). Converted Figma designs into pixel-perfect React interfaces and built the serial-number warranty verification flow, validating customer input against a database of generated keys, while optimizing translation bundles to keep **page loads sub-second**.

Alzahra Gold Wholesaler B2B Platform Mar 2024 – Apr 2024 Live Demo | Desc

Built the Next.js frontend for a wholesale gold trading portal – the landing page in full, and contributed to the buyer dashboard on top of a Django API, optimizing landing page performance to achieve a desktop **Lighthouse score of 99**.

Taxiland Ride-Sharing Platform May 2024 – Aug 2024 Archived MVP

Collaborated on an intercity ride-sharing app. Built the mobile app for passengers and drivers, and contributed to the tRPC backend, including endpoints powering the dispatch admin panel used for driver assignment and support tickets.

SELECTED SOLO PROJECTS

Atrafian Chat & Social Ecosystem Jan 2026 – Mar 2026 Landing Demo | Dashboard | App Demo

Solo full-stack + mobile (Capacitor.js) social platform featuring radar user discovery, stories, MinIO storage, client NSFW auto-moderation, and wallet/credit payments.

- Architected Socket.io chat gateway with dynamic room routing, offline/online state reconciliation between Zustand and React Query, optimistic UI updates, and virtualized chat lists.
- Eliminated N+1 query bottlenecks via bulk SQL aggregations, maintaining **sub-second delivery and smooth 60fps animations in 1,000+ user rooms**.

K2N Solutions Inc. Website Jul 2026 – Aug 2026 k2ninc.com

Pitched and delivered a static Next.js rebuild of a legacy WordPress site for an electrical engineering consulting firm, cutting load times to **sub-second** and giving the client direct cPanel image management with no required rebuilds.

RAG Pipeline & Vector Search Experiments Personal Project

Built RAG workflows using Python, vector embeddings, document chunking, and similarity search for querying unstructured document datasets.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML5, CSS3.

Databases: PostgreSQL, Redis, Celery, Prisma, SQLite, SQL, Elasticsearch.

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, Framer Motion, TanStack Query, Zustand, RHF, Responsive UI.

DevOps & Infra: Docker, AWS S3, Nginx, CI/CD, Linux Server, Bash, Turborepo, pnpm, Git.

Backend: Node.js, NestJS, FastAPI, REST APIs, tRPC, WebSockets, Swagger, Zod, JWT.

Testing & Other: Playwright, Unit Testing, API Automation, SEO, i18n, LLM Integration.

EDUCATION

B.S. in Computer Science Graduated 2026 Science and Research Branch (SRBIAU)
