PARSA NIAVAND

Backend Engineer | **Software Engineer**

Node.js / NestJS / PostgreSQL / TypeScript / Redis

vvsparsa@gmail.com · linkedin.com/in/parsany · github.com/parsany · parsany.com · +374 33 877 067 · Yerevan, Armenia

Backend engineer with 3 years production experience, specializing in Node.js, NestJS, microservices architecture, PostgreSQL, and NoSQL (Redis/Elasticsearch). Experienced in high-throughput data ingestion, REST/tRPC APIs, and building secure, real-time systems.

PROFESSIONAL EXPERIENCE

Backend Engineer — Codesheen
Full-time, On-site — Oct 2023 – Jul 2026

- Collaborated directly with enterprise clients across **8+ production projects** to translate business requirements into scalable NestJS microservices and robust API contracts.
- Implemented defense-in-depth auth architectures (OTP flows, JWT session management, fine-grained RBAC), ensuring secure data isolation across all user tiers.
- Troubleshot and resolved complex production issues, optimizing PostgreSQL queries and indexing with Prisma ORM to eliminate runtime bottlenecks.
- Introduced end-to-end type safety between server and client via tRPC and Zod, **reducing runtime errors and improving API reliability**.

Selected Project Deliverables:

Goldenbat GPS Tracking Sep 2024 – Jan 2025 — Live Demo | Mobile Demo | Dashboard

Co-built a high-throughput GPS ingestion backend processing **10,000+ coordinate updates per minute** with **sub-second latency** — serving live positions, historical routes, geofencing alerts, and device telemetry to fleet operators.

Battery ESP/MSK E-Commerce Dec 2025 – June 2026 — Live Demo | Dashboard

Built the shared NestJS backend for two production bilingual e-commerce brands. Architected PostgreSQL schemas and designed solutions within a microservices architecture using a Turborepo monorepo.

Alzahra Gold Wholesaler B2B Platform Mar 2024 – Apr 2024 — Live Demo | Desc

Contributed to the Django REST backend for a wholesale B2B gold portal — engineered endpoints for real-time pricing, order management, and transaction auditing consumed by the buyer dashboard.

Taxiland Ride-Sharing Platform May 2024 – Aug 2024 — Archived MVP

Contributed to the tRPC/NestJS backend for an intercity ride-sharing platform — built endpoints for passenger booking, driver assignment logic, and the support ticketing system powering the dispatch admin panel.

SELECTED SOLO PROJECTS

Atrafian Chat & Social Ecosystem Jan 2026 – Mar 2026 — Landing Demo | Dashboard | App Demo

Sole architect and developer of the NestJS backend for a production social platform with real-time chat, stories, media handling, and payment processing.

- Architected a Socket.io real-time chat gateway with automated FCM push fallbacks for offline clients and dynamic socket room routing.
- Eliminated N+1 query bottlenecks in group messaging via single-query bulk SQL aggregations, maintaining **sub-second delivery in 1,000+ user rooms**.
- Built a server-side content filter pipeline and support ticketing system, integrated with a wallet/credit gateway.
- Managed media uploads through self-hosted MinIO and built cloud-based backend infrastructure using Redis for OTP delivery and session caching.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL.

Backend & APIs: Node.js, NestJS, FastAPI, REST APIs, tRPC, WebSockets, Swagger, Zod.

Databases: PostgreSQL (SQL), Redis, Elasticsearch (NoSQL), Prisma ORM, SQLite.

Auth & Security: JWT, OTP flows, RBAC, Data Validation.

DevOps & Cloud: Docker, Nginx, Linux Server, AWS S3 / MinIO, CI/CD, Bash.

Architecture & Tools: Microservices, Turborepo, Celery, pnpm, Git, Unit Testing, API Automation.

EDUCATION

B.S. in Computer Science Graduated June 2026 — Science and Research Branch (SRBIAU)
