PARSA NIAVAND

DevOps Engineer | **Systems Engineer (Infrastructure & Operations)**

Linux / Docker / CI/CD / Bash / AWS / Nginx / Observability

vvsparsa@gmail.com · linkedin.com/in/parsany · github.com/parsany · parsany.com · +374 33 877 067 · Yerevan, Armenia

DevOps / Systems Engineer with 3 years hands-on experience deploying, automating, and maintaining multi-tier Linux infrastructure, Docker containerization, CI/CD pipelines, and PostgreSQL databases, with proven on-call reliability and active interest in cloud-native tooling (Terraform, Kubernetes).

PROFESSIONAL EXPERIENCE

DevOps / Systems Engineer (Infrastructure & Operations) Codesheen

Full-time, On-site Oct 2023 – Jul 2026

- Maintained high uptime, performance monitoring, and server stability across production and staging environments for **8+ concurrent client projects**.
- Built and maintained automated deployment workflows with Git, Bash, and CI tools, reducing manual release steps and standardising deployments.
- Deployed and orchestrated multi-tier services utilizing Docker containerization, Nginx reverse proxy routing, and automated SSL/TLS certificate management.
- Executed routine system updates, security patches, and database maintenance (PostgreSQL, Redis) to ensure platform security and data integrity.
- Monitored system health, log streams, and server metrics; promptly diagnosed root causes of performance bottlenecks and production alerts.
- Authored technical documentation, standard operating procedures (SOPs), and deployment runbooks to streamline operational handoffs.
- Demonstrated high operational discipline, active participation in on-call rotations, and fast incident resolution during live production launches.

Selected Infrastructure & Production Deliverables:

Goldenbat GPS Telemetry Platform Live Demo | Dashboard

Maintained production server environment ingesting **10,000+ telemetry coordinates/min**; configured Nginx request routing, WebSocket feeds, and monitored server latency.

Atrafian Real-Time Ecosystem Landing Demo | Dashboard

Managed Docker containerized services (Redis, PostgreSQL, MinIO); optimized database query efficiency and monitored socket server health for high-traffic environments.

Multi-Tier E-Commerce & B2B Infrastructure Battery Demo | B2B Demo

Configured multi-tier Linux server deployments for turbo-repo projects with different tenancies, SSL certificates, Nginx caching, and PostgreSQL database updates across production and staging environments.

SKILLS & TECHNICAL PROFICIENCIES

DevOps & Containers: Docker, Docker Compose, CI/CD Pipelines (GitHub Actions and Gitlab), Containerization, Git.

Linux & Cloud Infra: Linux (Ubuntu/Debian), AWS (EC2, S3), Nginx Reverse Proxies, SSL/TLS, DNS, TCP/IP.

Scripting & Automation: Bash Scripting, Python Automation, REST APIs, WebSockets.

Observability & Databases: PostgreSQL, Redis, SQL, Log Analysis, System Monitoring, Health Checks, Incident Triage.

Eager to Learn / Expanding Into: Terraform (IaC), Kubernetes (k8s), Helm, Prometheus & Grafana.

EDUCATION

B.S. in Computer Science Graduated 2026 Science and Research Branch (SRBIAU)
