PARSA NIAVAND

Technical Support Specialist

vvsparsa@gmail.com · linkedin.com/in/parsany · github.com/parsany · parsany.com · +374 33 877 067 · Yerevan, Armenia

Software engineer with 3 years of production experience who enjoys digging into how systems function. Comfortable diagnosing root causes across large volumes of technical data, replicating issues, and explaining findings clearly to non-technical colleagues.

PROFESSIONAL EXPERIENCE

Full-stack Engineer (client-facing) — Codesheen
Full-time, On-site — Oct 2023 – Jul 2026

- Diagnosed and resolved issues on live production systems across **8+ concurrent projects**, tracing root causes through logs, databases, and API behavior rather than surface symptoms.
- Provided live chat and phone support to clients, walking them through issues in real time alongside written follow-ups.
- Communicated technical findings in plain, written language to clients and non-technical stakeholders, ensuring quick and clear resolution.
- Queried and validated data directly in **PostgreSQL** to confirm root causes before reporting fixes.
- Used **Postman** routinely to test and verify REST API behavior during debugging.
- Documented issues and workflows using Trello, ClickUp, and Notion, keeping a clear paper trail across technical and non-technical teams.

Selected Project Deliverables:

Goldenbat GPS Tracking — Live Demo | Mobile Demo | Dashboard
Live fleet-tracking platform handling **10,000+ updates/min**. Traced a production incident in the notification pipeline through Celery worker logs, a Linux deployment mismatch, and a SQL duplication bug. three unrelated root causes stacked on top of each other, with no documentation to start from.

Alzahra Gold Wholesaler B2B Platform — Live Demo
B2B trading platform – built the buyer dashboard where wholesale clients place orders and track pricing.

Atrafian Social Ecosystem — Landing Demo | Dashboard
Real-time social app – diagnosed and resolved issues across authentication, media uploads, and socket connections as the sole engineer on the platform.

Bilingual E-Commerce Platform — Live Demo | Dashboard
Live bilingual e-commerce site with an admin dashboard – shipped end-to-end, including the serial-number warranty verification flow.

Content Writer (Technical & SEO) — NoorNama
Contract — Oct 2019 – Jan 2021

- Wrote clear product and buying-guide content for camera and digital equipment, explaining technical specs in plain language.
- Maintained a consistent publishing schedule – directly applicable to authoring internal documentation and knowledge base articles.

KEY STRENGTHS

- **Root-Cause Investigation:** Genuine interest in why something broke, not just patching the symptom – built the habit through three years of debugging production systems.
- **Technical Data Comfort:** Direct experience with SQL queries, API testing (Postman), and reading server logs to confirm a hypothesis before reporting it.
- **Clear Written Communication:** Practiced at explaining technical root causes in plain language to non-technical colleagues and clients.
- **Patience with Repetitive Work:** Comfortable with the detail-oriented, repeatable nature of triage and documentation across many concurrent projects.
- **Systems Comfort:** Hands-on background with Linux, Docker, Nginx, and network troubleshooting.

TECHNICAL BACKGROUND

SQL / PostgreSQL, Postman, REST APIs, Linux Server (Ubuntu/Debian), Docker, Nginx, Git, Redis, TypeScript, Python, Network Troubleshooting (DNS, SSL, HTTP/WS), CI/CD pipelines.

EDUCATION

B.S. in Computer Science Graduated 2026 — Science and Research Branch (SRBIAU)

LANGUAGES

Persian: Native | **English:** Fluent (C2 / Near-Native)
