PROFILE

Motivated Computer Science graduate with hands-on experience managing, deploying, and maintaining multi-tier production and development environments. Proficient with Linux (Ubuntu/Debian) and Windows server operating systems, Nginx reverse proxy configuration, Docker containerization, and relational databases. Possesses a strong analytical and troubleshooting mindset, experience monitoring system performance and responding to alerts, and full flexibility to work operational shifts. Upper-intermediate / fluent in English (spoken and written).

SKILLS & TECHNICAL PROFICIENCIES

Operating Systems & Infra: Linux (Ubuntu/Debian), Windows Server, System Administration, Multi-tier Environments

Web Technologies & Servers: Nginx, Reverse Proxies, WebSockets, REST APIs, SSL/TLS, Networking Fundamentals

Containers & Cloud: Docker, Containerization, AWS (S3, EC2), Bash Scripting, Python, CI/CD, Git

Databases & Operations: PostgreSQL, Redis, SQL, Monitoring & Alerting, Log Analysis, Troubleshooting

EXPERIENCE

Systems / Software Engineer (Operations & Client Support)

Codesheen

Full-time, On-site

Oct 2023 – Jul 2026

- Maintained smooth operation, performance monitoring, and uptime across both production and development environments for 8+ concurrent projects.
- Deployed web applications and microservices across multi-tier server architectures utilizing Nginx web servers and Docker containerization.
- Executed routine software updates, system patches, and database maintenance to ensure platform stability and security.
- Monitored system health and performance indicators; promptly diagnosed root causes of alerts and escalated complex client issues to senior engineers.
- Authored technical documentation, standard operating procedures (SOPs), and deployment guides to streamline onboarding and knowledge sharing.
- Utilized Bash scripting and Git workflows to automate deployment routines and maintain clean configuration management across servers.
- Demonstrated high adaptability and flexibility while working in rotational shifts and providing production launch support.

Selected Infrastructure & Production Deliverables:

Goldenbat GPS Tracking Platform

[\[Live Demo\]](#) [\[Dashboard\]](#)

Maintained production server environment ingesting 10,000+ telemetry coordinates/min; configured Nginx request routing, web socket feeds, and monitored system latency.

Atrafian Social Ecosystem

[\[atrafian.ir\]](https://atrafian.ir)

Managed Docker containerized services (NestJS, Redis, PostgreSQL, MinIO); optimized database query efficiency and monitored socket server health for high-traffic rooms.

Bilingual E-Commerce & B2B Platforms

[\[Live Demo\]](#) [\[B2B Demo\]](#)

Configured multi-tier deployments, SSL certificates, Nginx caching, and PostgreSQL database updates across production and staging environments.

EDUCATION

B.S. in Computer Science

SRBIAU – Tehran, Iran

June 2026

LANGUAGES & AVAILABILITY

English: Upper-Intermediate / Fluent (Spoken & Written) — **Persian:** Native

Shift Flexibility: Fully available and flexible to work in rotational shifts as required by operational schedules.
