

Parsa Niavand

Backend Engineer | Software Engineer

Node.js / NestJS / PostgreSQL / TypeScript / Redis

Yerevan, Armenia • vvsparsa@gmail.com • [+374 33 877 067](tel:+37433877067)
parsany.com • github.com/parsany • linkedin.com/in/parsany

Backend engineer with 3 years production experience, specializing in Node.js, NestJS, PostgreSQL, and distributed caching, experienced in high-throughput data ingestion, REST/tRPC APIs, and real-time systems.

PROFESSIONAL EXPERIENCE

Backend Engineer

Full-time, On-site

Codesheen

Oct 2023 – Jul 2026

- Designed and maintained production NestJS APIs across **8+ client and internal projects** over a 3-year tenure in a 7-engineer team.
- Modeled relational schemas in PostgreSQL with Prisma ORM, enforcing strict data integrity and migrations across multi-tenant monorepos.
- Implemented authentication systems using OTP-based flows, JWT session management, and fine-grained RBAC, isolating roles across all user tiers.
- Introduced end-to-end type safety between server and client via tRPC and Zod, **reducing runtime errors and improving API reliability**.

Selected Project Deliverables:

Goldenbat GPS Tracking Sep 2024 – Jan 2025

[\[Live Demo\]](#) [\[Dashboard\]](#)

Co-built a high-throughput GPS ingestion backend processing **10,000+ coordinate updates per minute** with **sub-second latency** — serving live positions, historical routes, geofencing alerts, and device telemetry to fleet operators.

Battery ESP/MSK E-Commerce Dec 2025 – June 2026

[\[Live Demo\]](#) [\[Desc\]](#)

Built the shared NestJS backend for two production bilingual e-commerce brands in one Turborepo monorepo. Architected PostgreSQL schemas and engineered a **serial-number warranty verification system**, validating customer input against database keys while keeping **response times sub-second**.

Alzahra Gold Wholesaler B2B Platform Mar 2024 – Apr 2024

[\[Live Demo\]](#) [\[Desc\]](#)

Contributed to the Django REST backend for a wholesale B2B gold portal — engineered endpoints for real-time pricing, order management, and transaction auditing consumed by the buyer dashboard.

Taxiland Ride-Sharing Platform May 2024 – Aug 2024

[\[Archived MVP\]](#)

Contributed to the tRPC/NestJS backend for an intercity ride-sharing platform — built endpoints for passenger booking, driver assignment logic, and the support ticketing system powering the dispatch admin panel.

SELECTED SOLO PROJECTS

Atrafian Chat & Social Ecosystem Jan 2026 – Mar 2026

[\[atrafian.ir\]](https://atrafian.ir) [\[App Demo\]](#)

Sole architect and developer of the NestJS backend for a production social platform with real-time chat, stories, media handling, and payment processing.

- Architected a Socket.io real-time chat gateway with automated FCM push fallbacks for offline clients and dynamic socket room routing.
- Eliminated N+1 query bottlenecks in group messaging via single-query bulk SQL aggregations, maintaining **sub-second delivery in 1,000+ user rooms**.
- Built a server-side content filter pipeline and support ticketing system, integrated with a wallet/credit gateway.
- Managed media uploads through self-hosted MinIO; used Redis for OTP delivery and session caching.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Backend & APIs: Node.js, NestJS, FastAPI, REST APIs, tRPC, WebSockets, Swagger, Zod

Databases & Cache: PostgreSQL, Redis, Prisma ORM, SQLite, Elasticsearch

Auth & Security: JWT, OTP flows, RBAC, Data Validation

DevOps & Cloud: Docker, Nginx, Linux Server, AWS S3 / MinIO, CI/CD, Bash

Architecture & Tools: Turborepo, Celery, pnpm, Git, Unit Testing, API Automation

EDUCATION

B.S. in Computer Science Graduated 2026

Science and Research Branch (SRBIAU)
